✦ WHAT I DO

Digital things that help children with **big feelings**.

I'm one person building books, games, courses and creative tools that turn emotional wellbeing into something kids can hold, play and learn from. It started as an author with a laptop and no framework. It's now a 100+ page platform — free to use, safe by design, and made entirely in-house.

WHAT I'VE BUILT SO FAR

6

Picture Books

On anxiety, courage, fear of the dark, belonging & online safety.

15+

Browser Games

Free to play, plus co-operative card & tabletop games for families.

25

Free Workshops

Game design, code & storytelling with XP, quizzes & certificates.

20+

Creative Tools

Sprite, level, sound & character makers kids use in minutes.

WHY IT'S DIFFERENT

Emotional-first. The stories name the hard things honestly and gently, then games and lessons let kids explore them by doing.

Safe & free by design. No ads, no accounts, no data taken from a single child. Just open it and go.

Handmade craft. A 100+ page platform with zero frameworks or templates — quality you can feel in every corner.

One creator, wide reach. Writing, art, code, design and teaching — all under one roof, moving fast.

WHAT I'M LOOKING FOR

Advice & mentorship

Introductions

Partnerships

Funding

Guidance from people who've built at scale, introductions to the right networks, partners who could put this in front of more children, and the funding to grow it. **If that's you — or someone you know — I'd love a conversation.**
